

IBERITAL Junior

The Iberital Junior is produced by Iberital, a leading company in the design and manufacture of professional espresso machines and grinders.

The Iberital Junior offers exceptional value for money with its hard working components and minimalist design.

Touch Pads: Five programmable selections on each group ensure delivery of consistent espresso measures.

Steam Arms: The two steam arms rotate to deliver an easily controlled steam supply for making quality cappuccinos.

Hot Water: The anti splash hot water dosification can be electronically programmed so that the desired quantity of water is obtained at the touch of a pad.

Pressure Gauge: Water and steam pressure are continuously monitored and controlled. Two independent gauges indicate boiler and motor pump pressure.

Element protector device included.

Machines Available:

Two Group Semi-Automatic
Two Group Fully Automatic

TECHNICAL SPEC: 2 Group Automatic
Power Requirements: 20A
Boiler Capacity: 10.5 LT
Heating Element: 3KW
Dimensions: 690w x 475d x 460h
Optional: 4 different colours
