

 **nuova**  
**SIMONELLI**<sup>®</sup> **microbar**  
espresso coffee machines

An extremely compact automatic espresso coffee machine, but with all the features and functions of a maxi professional. Serving coffee from the Microbar means that everything is 'on tap'.

**Coffee:** Choose from eight "made-to-measure" coffee drinks; hot water and steam.

**Cappuccino:** Cappuccino with froth adjustment; eight coffee drinks and five other drinks are "made-to-measure"; hot water and steam.

**No-problem grounds:** Electronic management of the dispenser group so that the coffee grounds are always dry.

**Dual pressing system:** Make coffee with different flavors, thanks to a dispenser (a single coffee or two coffees) that will blend two types of coffee.

**High yield, low consumption:** All the steam you want and energy savings thanks to two insulated, high pressure boilers.

**Long Life:** More than just an ordinary batch grinder. Micrometric grinding will optimize the fineness of the ground coffee; the grinders are titanium-coated to extend their useful life. The motor power (150 watt) allows low-speed, uniform grinding, so no burned coffee.

**Easier than ever:** The modern blue display makes functions programming quick and user-friendly. Innovative technology: mother board (CS) multilayer-type, with 4 electromagnetic anti-disturbance levels. The menu can be modified from the key panel with specific functions

**TECHNICAL SPEC:**

Dimensions: 350w x 430d x 540h

Tank Capacity: 2.3LT

Bean Hopper Capacity: 500G

Average daily output of approx: 50 cups
